**UNSC Mammoth • Mamut de CENU • Mammouth de l'UNSC • RVN Mammut
RVN Mammoet • Mammut UNSC • Mamute CENU**

The M510 Mammoth siegework has no equal in size, firepower, or tactical faculty within the UNSC's mobile planetside support contingent, making it one of the most powerful ground assets ever designed by humans. At roughly 70 meters in length and carrying numerous mounted support weapons and materiel caches, the M510's most significant attribute is its topside MAC, designed to target and eliminate hostile vessels, weapons, and even fortifications residing in terrestrial or even suborbital positions.

La armadura Mamut M510 no tiene igual en tamaño, potencia de fuego o facultad táctica dentro del contingente de apoyo móvil de CENU, por lo que es uno de los activos de tierra más potentes jamás diseñado por hombres. A unos 70 metros de largo y cargando numerosas armas de apoyo montadas y bodegas de materiales, el atributo más importante de M510 es su parte superior MAC, diseñada para atacar y eliminar buques enemigos, armas e incluso fortificaciones que residen en los puestos terrestres o incluso suborbitales.

Le Mammouth M510 d'assaut n'a pas d'équivalent en termes de taille, de puissance de feu ou de capacités de combat au sein du contingent terrestre mobile de l'UNSC, ce qui en fait un des effectifs terrestres les plus puissants fabriqués par les humains à ce jour. En plus de sa longueur d'environ 70 mètres, de son armement intégré considérable et de ses nombreux espaces d'entreposage de matériel, la caractéristique la plus importante du M510 est son CAM supérieur, conçu pour cibler et éliminer les vaisseaux, armements et fortifications ennemis, qu'ils soient terrestres ou en position suborbitale.

Es gibt innerhalb des mobilen RVN-Kontingents zur planetaren Unterstützung kein dem M510 Mammut vergleichbares Fahrzeug im Bezug auf Größe, Feuerkraft oder taktische Fähigkeiten. Es ist eine der schlagkräftigsten Bodenwaffen, die jemals von Menschenhand entworfen wurden. Das M510 ist etwa 70 Meter lang und verfügt über eine Vielzahl aufmontierter Waffen und Materiallager. Sein wichtigstes Bestandteil ist die MAC an der Oberseite, mit der feindliche Fahrzeuge, Waffen und sogar Befestigungen am Boden oder sogar in suborbitalen Stellungen unter Beschuss genommen und eliminiert werden können.

Het geschutvoertuig M510 Mammoet is het grootste en krachtigste voertuig in het mobiele planetside ondersteuningscontingent van het RVN en beschikt ook over meer tactische functies dan enig ander voertuig. Daarmee is het een van de krachtigste grondmiddelen die de mens ooit heeft ontworpen. De M510 is ongeveer 70 meter lang en is uitgerust met een groot aantal ondersteunende wapens en verborgen materieel. Het belangrijkste geschut is het MAC-kanon aan de bovenzijde, dat bedoeld is om vijandige voertuigen, wapens en zelfs vestingwerken op de grond of op suborbitale posities uit te schakelen.

Il Mammut M510 d'assedio non ha rivali per quanto riguarda dimensioni, potenza di fuoco, o facoltà tattica nel contingente di supporto di planetside dell' UNSC, questo lo rende uno dei più potenti mezzi da guerra terrestri mai progettati dagli umani. Presenta circa 70 metri di lunghezza e trasporta numerose armi di supporto montate e nascondigli per il materiale, ma l'attributo più significativo dell'M510 è il MAC posto sulla parte superiore, progettato per centrare ed eliminare navi ostili, armi e perfino fortificazioni situate in posizioni terrestri o suborbitali.

O siegework M510 Mamute é único em tamanho, poder de fogo e habilidades táticas entre o contingente de apoio móvel do planetside da CENU, o que o torna um dos mais poderosos recursos terrestres já criados pelos humanos. Com quase 70 metros de comprimento e carregando diversas armas de suporte e esconderijos, a característica mais marcante do M510 é o seu MAC superior, desenhado para mirar e eliminar navios, armas e até fortes terrestres ou suborbitais.
